SURFACE PROTECTION FILM

Main Tape manufactures quick peel surface protection films with an eco-friendly adhesive system. DuroMask™ enhanced durability masking film has been created to prevent damage of vulnerable or exposed surfaces during forming and fabrication of your products. These co-ex films remove easily without tearing, leaving no adhesive residue behind.

A range of tack levels are available for multiple applications, including enhanced capabilities during forming and fabrication processes. Labor-saving protection that is easy to apply & easy to remove, DuroMask™ high performance protective films protect your project from concept to completion.

Surface protection films from Main Tape. Committed to our products and committed to finding you the perfect application.
