Dear Surface Protection Customer

It is with great pleasure that we announce the acquisition of the Main Tape surface protection business* by the Chargeurs Group. As you may know, Chargeurs is the parent company of Novacel S.A. and Novacel, Inc., the World's Leader in surface protection products. The acquisition will strengthen the position of Chargeurs & Novacel in the North American market while the Main Tape business offers products that complement our current portfolio and expands participation into additional end-use markets.

Both Novacel & Main Tape have enjoyed strong reputations and have proudly served customers in this important market. As we work to integrate the activities, we will strive to find the best elements offered by each company to strengthen the support we deliver to our Customers! We will look for opportunities to improve service platforms & optimize product technology. We will use our combined production systems, manufacturing expertise & supply chain knowledge to enhance the value & quality of our products. The combination of two key participants in the surface protection market is very exciting and we look forward to the future!

In the mean time, please consider everything as "business as usual". Please continue to interact with both Novacel, Inc. and Main Tape exactly as you have in the past. As we work to combine the activities in the next few weeks, we will work diligently to ensure the transition is seamless for you!

We look forward to an exciting future as we expand our support to the surface protection market!!

**Please note, the acquisition pertains ONLY to the Surface Protection business of Main Tape. Products that were previously provided by Main Tape from the Graphics product portfolio will continue to be serviced by RTape (a separate notice will be provided by Nekoosa Coated Products).*

Sincerely,

A handwritten signature in black ink that reads 'David G. Anderson'. The signature is fluid and cursive, with a long horizontal stroke at the end.
